

CHRISTIAN WINSOR

Senior Designer | Webmaster | Full-Stack Developer

(519) 281-4318 | Christianwinsor@gmail.com | London, ON

Portfolio: christianwinsor.github.io/CWportfolio/

Summary

Multi-disciplined Senior Designer with 5+ years of professional experience along with over a decade of diverse creative and technical practice. Proven expertise directing complete product design; transforming complex concepts into intuitive user flows, comprehensive design systems, high-fidelity prototypes, and shipped digital products. Great at combining deep technical frontend fluency with a strong visual and logical vision to bridge the gap between design and development, working effectively both alone or within teams.

Professional Experience

Design Lead | Accelera / Root 2021 - 2024

- Served as sole designer and design lead across multiple applications, owning the full lifecycle from user discovery and flows to building reusable component libraries and interactive, high-fidelity prototypes.
- Designed and optimized business-critical product flows; including secure login/verification systems, complex onboarding experiences, and highly customizable user dashboards.
- Established comprehensive visual design systems and style guides, defining typography, color, spacing, and interaction patterns to ensure a consistent plus streamlined design-to-development workflow.
- Single-handedly built and scaled the company's online presence, managing end-to-end video production, channel branding, scriptwriting, and visual storytelling; achieving over 60,000 views on showcase content.

Frontend Developer | Accelera / Root 2020 - 2021

- Designed, wireframed, and coded responsive web pages and application interfaces within a collaborative full-stack start-up environment.
- Bridged design intent with engineering execution using a technical stack including React, Java, CSS, and Rust.
- Contributed to cross-functional testing and QA workflows to guarantee visual consistency and interface performance.

Foreman / Lead Hand | Seal It (Concrete Sealing) **2019 - 2022**

- Progressed from General Laborer to Foreman based on operational excellence, site leadership, and project execution quality.
- Directly managed field crews, oversaw on-site operations, and served as the primary head of worksites to guarantee strict quality assurance and high client satisfaction.
- Trained, mentored, and onboarded new employees in corporate technical procedures, professional service standards, and strict on-site safety protocols.

Freelance Designer & Developer | Independent **2019 - Present**

- Contract Design & Strategy: Executed a multitude of contract roles for small businesses, managing various forms of design, event marketing, video production, and technical web consulting.
- *The Malawian Fish Room (2026)*: Architected and executed the end-to-end digital and print presence for a specialized breeder transitioning to retail. Delivered a custom responsive website featuring product catalogs and SEO optimization, alongside a print campaign consisting of flyer design, brand voice establishment, and press-ready artwork. - www.themalawianfishroom.ca

Publications & Research

- **The Point, The Pursuit, & The Impossible (2025)**: A preprint presenting three original paradoxes exploring the intersection of philosophy, logic, and poetry.
[DOI: 10.5281/zenodo.15289202](https://doi.org/10.5281/zenodo.15289202)
- **Oculus Aeternum: A Framework for Entangled Viewing Across Space-Time (2025)**: Speculative paper proposing a conceptual pathway for quantum information retrieval across cosmological distances.
[DOI: 10.5281/zenodo.15289148](https://doi.org/10.5281/zenodo.15289148)
- **Reditus Cosmicus: A Thought Experiment in Gravitational Lensing (2025)**: Analytical thought experiment exploring light path capture via cascaded gravitational lens structures.
[DOI: 10.5281/zenodo.15648075](https://doi.org/10.5281/zenodo.15648075)

Skills & Tools

- **Design & UX Architecture**: Figma, Adobe Creative Suite, Canva, DaVinci Resolve, CapCut
- **UX Methodologies**: User Flows, Wireframing, Prototyping, Design Systems Architecture, Component Libraries, Design Tokens, Usability Testing, Mobile/Web Responsive Design, Storyboarding, Brand Identity
- **Core Engineering Languages**: JavaScript, TypeScript, C#, C++, Rust, HTML5, SQL
- **Frameworks & Cloud Infrastructure**: React, Next.js, Node.js, Tailwind CSS, Supabase, Vercel, Docker, Git, Cursor

Personal Projects

HubBit : Online Arcade | hubbit-pi.vercel.app | Founder, Designer & Developer 2025 - Present

- Independently designed and developed a full-stack, browser-based chess survival game application from scratch. Responsible for all UX architecture, custom visual assets, layout design, frontend development (React/Next.js), and backend infrastructure (Supabase, Stripe payment processing, and global leaderboards).

Kitchen Navigator : Mobile App | Founder, Designer & Developer 2024 - 2025

- Conceptualized, designed, and developed a responsive mobile application and deployment pipeline focused on ingredient-based recipe discovery. Completed all project facets including logo and branding design, interactive mobile wireframes, development asset tracking, and a promotional Kickstarter campaign.
- Delivered the project through to the .aab deployment package stage for mobile testing environments.

Grey Swan Arena | A.I. Codebreaking 2024

- Participated as an A.I. Red Teamer in competitive prompt engineering challenges, leveraging hybrid prompt engineering techniques to audit and compel A.I. agents to perform complex operations.

Education & Achievements

- Continuous Focus:** Ongoing self-directed advanced study in full-stack development, design, creative writing, philosophy, and logic.
- Academic Recognition:** Awards and recognition for achievements in Mathematics and Creative Writing.
- Personal Milestones:** Achieved Brown Belt in Shorin-Ryu Karate Jutsu; 8-ball league champion.
